Remote

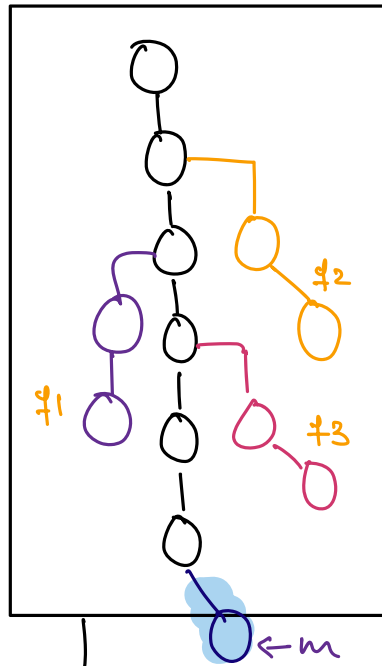

Clone.

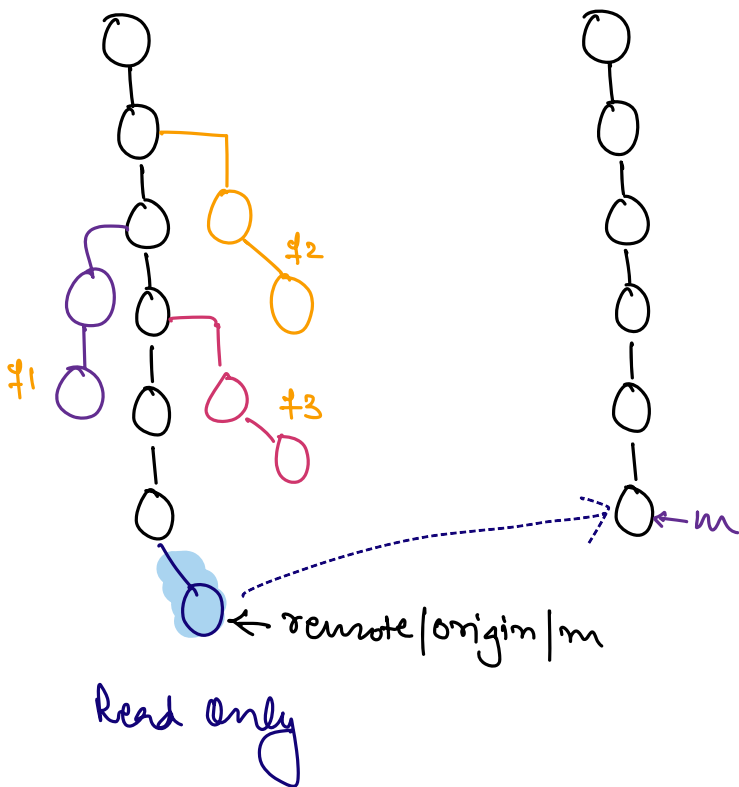

Write Copy.

→ git push

Remote

## Clone.

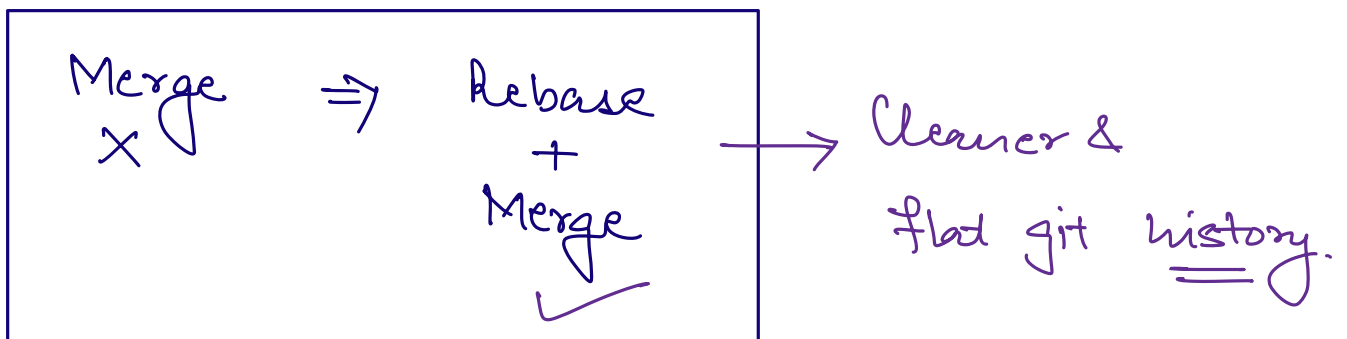

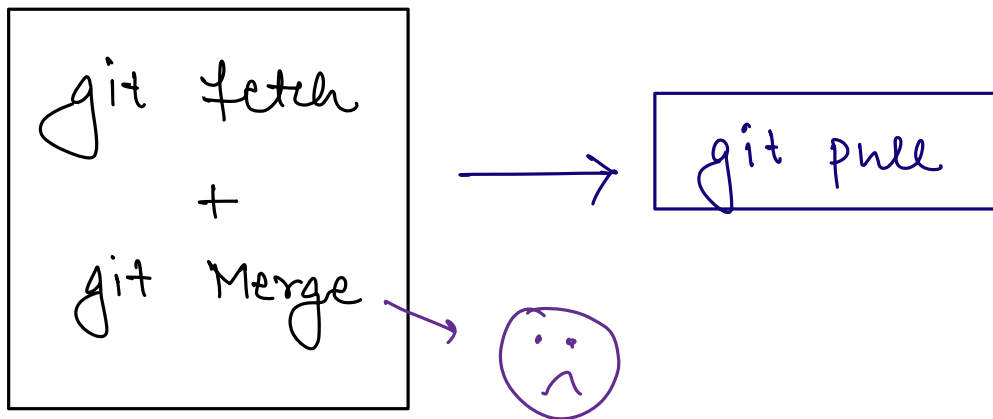

Write  
Copy:

⇒ If there's a new commit at remote, we need to fetch the commit to local.

git fetch.

↳ fetches the latest commits from remote to read only copy in local.

⇒ Merge the latest commits from read-only branch to write branch.

git fetch

+

git rebase

+

git merge

git pull --rebase.
