

Agenda.

→ SQLAlchemy ORM

→ Relationships

→ Eager vs Lazy loading.

users

id	name	email
1	Deepak	d@gmail.com

posts

id	Content	user_id
110	—	1
200	—	1
300	—	1

`session.get_one(User, input_user_id)`

↪ `select * from users` ↪ 1

↪ `where id = 1`

↪ `User(id=1, name=Deepak, email=—)`

session.get_one(User, input_user_id)

Only get
the User
data

LAZY

Default
behaviour of
SQLAlchemy
ORM.

Get the user
data along with
the associated
posts data.

JOIN Query

Eager
